LOCKERS & CUPBOARDS

A visible advantage to storage in the workplace

The **Insight range** of lockers and cupboards are designed for use in areas where there is a need for a visual inspection of contents without compromising the security of items stored.

The clear polyethylene panels allow easy inspection of contents, acting as a deterrent to workplace pilfering or providing quick visual stocktaking of items stored.

When used in public areas **Insight Lockers** provide security staff with the ability to check that items stored are not inappropriate or pose no security threat.

Lockers feature welded reinforced doors and door frames, ventilated body and robust powder coated finish in a wide range of door colours.

Ideal for use in

- Food Industry
- Catering
- Retailing
- Manufacturing Areas
- Museums and Galleries
- Government Buildings
