

# From Every Angle, Superior Protection For Your Racks, Floors, and Inventory

**Rack Sentry®**

**takes a beating**

**so your**

**rack systems**

**don't have to!**

Rack damage is a problem in virtually every warehouse. Rack systems are not designed to be struck by lifting equipment, let alone to be impacted on an ongoing basis...

Metal protection can crumple upon tow motor impact. And metal doesn't spring back to its original shape. Once damaged, metal is no longer effective and needs to be replaced. Also, it may have been bolted to both your rack and floor. Upon impact, both can be damaged, as well as your inventory.

**Rack Sentry®**, a Sentry Protection Products innovation, is the answer to these problems! **Rack Sentry**, using the patented Sentry Air Cushion System, is always on guard protecting the structural integrity of your rack system, solving your rack abuse problems. Your racks, inventory, and floor are safe, time after time.

# Rack Sentry® minimizes rack damage by absorbing the force of tow motor impact, and it's:

## Tougher than your tow motor

- **Rack Sentry**, a patented product, is molded from a semi-flexible and stress-crack resistant plastic
- 9 pockets strategically placed throughout Rack Sentry are angled to deflect impact energy away from the rack
- **Rack Sentry** surrounds rack legs, protecting from damage at all angles

## Easy to see

- Bright Safety Yellow
- UV stabilized plastic prevents fading
- Waterproof, easy to clean and removable for maintenance
- Chemical-resistant and non-conductive

## Easy to install

- One person can install the lightweight **Rack Sentry** in seconds
- Simply position **Rack Sentry** around any rack leg and fasten the self-gripping straps
- No tools required
- Rack Sentry is easily stackable for greater protection
- Save time, labor, and the cost of other materials

## Cheaper than repair or rack replacement

- Protects both your inventory and the structural integrity of your rack system
- No floor damage upon impact because it is not attached to the floor
- Costs a fraction of rack, floor, or inventory repair/replacement
- A one-time insurance investment

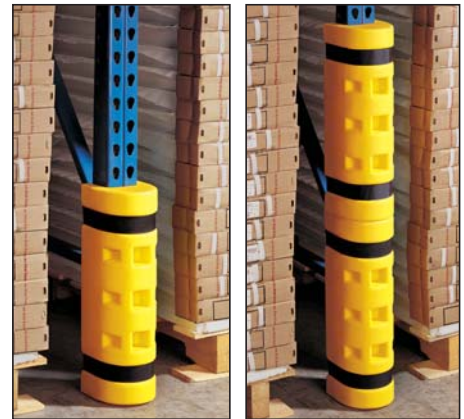

## Always on duty

- Protects any rack under the harshest of conditions
- Doesn't stay dented — pops back to original shape after impact, ready to stand guard again

|       |       |       |
|-------|-------|-------|
| RS75  | 75mm  | 3"    |
| RS80  | 80mm  | 3.25" |
| RS90  | 90mm  | 3.5"  |
| RS100 | 100mm | 4"    |
| RS120 | 120mm | 4.75" |

Easily installed by one person in seconds

Each unit is 18" tall and stackable for greater protection

Corner units provide complete rack protection

Available in widths to protect rack upright 3" to 4.75". 3" (75mm) is available with 6" cutout to accommodate horizontal beams
